

Julie Universal Emulator

There are many cars
but emulator is only one!

No car will ever surprise you!
You will no longer need to refer your customers to other workshops.
You have the choice of 68 programs.

You can use this emulator unlimited number of times for both
testing purposes or it can be left in a car permanently.
Program selection is effected by soldering jumpers from J1 to J7.
To connect the emulator, please refer to specific installation manual.

Universal Julie emulator includes

42 immo programs

18 seat occupancy sensor programs

8 tachometer tester programs

- no jumpers – diagnostic mode - it flashes every second
- VW Automatic, EDC15, EDC16 and ME7 if used before – does not flash
 - adjusting to the ECU – flashing 0,1 sec
- after adjusting it lights constantly and blinks every other second

VW automatic immo OFF (single use)

In Universal Julie Emulator
solder jumpers J5 and J6

Available as Universal Julie Emulator
program no. 1

VW automatic immo ON (single use)

In Universal Julie Emulator
solder jumpers J1, J5 and J6

Available as Universal Julie
Emulator program no. 2

**VW automatic immo OFF or ON programs
are single use and can only be used in one car!**

USE

TDI EDC16 CAN + K-line TDI EDC15 Gasoline Bosch ME7

Tested on the following electronic control units:

TDI EDC16 CAN + K-line

- 0 281 011 145 VW Passat B5 2.0 TDI, 2006 - mechanical ignition switch
- 0 281 011 258 VW Touareg 2.5 TDI, 2003 - 2010
- 0 281 011 364 Audi A3 1.9 TDI, 2004
- 0 281 011 383
- 0 281 011 385
- 0 281 011 568 VW T5 2.5 TDI, 2006 - 2007
- 0 281 011 843 VW Golf V 2.0 TDI, 2004
- 0 281 011 844 VW Touran 2.0 TDI, 2004
- 0 281 011 855 VW T5 1.9 TDI, 2003
- 0 281 011 856 VW T5 1.9 TDI, 2005
- 0 281 011 882 VW Caddy 1.9 TDI, 2006
- 0 281 011 883 Skoda Octavia 1.9 TDI, 2004 - 2010
- 0 281 011 900
- 0 281 011 945
- 0 281 011 946 VW Touran 1.9 TDI, 2006
- 0 281 011 907 VW Touran 2.0 TDI
- 0 281 012 220 VW Golf V 1.9 TDI, 2005
- 0 281 012 390 VW Caddy 1.9 TDI, 2003 - 2010
- 0 281 012 696 Seat Alhambra, VW Sharan 2.0 TDI, 2005 - 2010
- 0 281 012 698 Skoda Superb 2.0 TDI, 2006
- 0 281 012 762 VW T5 1.9 TDI, 2006r. - 2010
- 0 281 012 792
- 0 281 012 113 Audi A4 2.0 TDI, 2008

- 0 281 014 136 Skoda Octavia 1.9 TDI, 2006 - 2010
- 0 281 014 891 VW T5 2.5 TDI, 2009
- 0 281 014 384 Audi A6 2.7 TDI, 2007
- 0 281 015 175 VW Caddy 1.9 TDI, 2008

TDI EDC15

Capacity 1.2 1.4 1.9 2.5

From 2000 to 2004, some vehicles from 2006 to even 2008 (except Audi with coded pump)

Gasoline Bosch ME7

Capacity 1.4 1.8 2.0 2.4 2.6 2.8 3.0 3.5 4.2

- 0 261 201 144 VW Golf V 1.4 2002 - 2006
- 0 261 204 873 Audi A4/ VW Passat 1.8 1999
- 0 261 204 893 Audi A4 2.4 Quattro 2001
- 0 261 207 360 VW Bora 2.0 2000 - 2005
- 0 261 206 123 Passat 2.8 2000
- 0 261 206 019 Audi A8 4.2 2000
- 0 261 207 534 Seat Leon 1.8 20V 2002

16-pin OBD2 socket

1. Connect all the wires to the OBD2 socket

2. TURN IGNITION ON AND WAIT 20 SECONDS

3. When ignition is turned on, connect the emulator's plug to the emulator's PCB. Once connected, blue LED flashes fast and after several seconds the LED should emit a constant light and blink every other second

4. Turn ignition OFF and disconnect emulator

Programs no. 1 and 2 enable the emulator to automatically remove immo from a car by identifying ECU type and selecting a relevant program.

Attention! Selection of programs no.1 and 2 eliminates the possibility to use the remainder of the programs from 6 to 15.

VW without CAN

**In Universal Julie Emulator
solder jumper J1**

Available as Universal Julie Emulator
program no. 1

USE

W1 and W2 systems up to around 2001 EDC15 and 5-socket LT28/LT35 ECUs - when the chassis numbers are not entered - even up to 2006 diesel and gasoline Ford cars with VW systems (the VW symbol is visible on the ECU).

Connecting in place of the original immobiliser or instrument cluster.

If you cannot start the car, you need to fit the emulator to ECU.

If the emulator is not working, then connect the power supply of the emulator to +12V through the reset button.

Disconnect immo and connect W line with K line to have a diagnosis.

Cars with immobiliser integrated in instrument cluster as of 1998

Connection diagram examples

Cut K-line and W-line off the instrument cluster!!!

Cars with separate immobiliser

Connection diagram examples

8-pin immobiliser plug

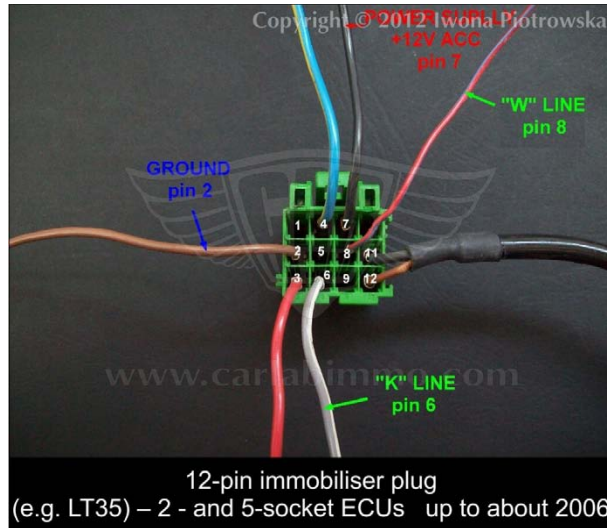

12-pin immobiliser plug

10-pin immobiliser plug
(e.g. certain VW T4 without CAN)

Connect pin 7 and 8 together in the plug of original immobiliser. Then connect emulator to the OBD socket (GND - pin 4, +12V ACC - pin 16, K-line - pin 7)

Connecting emulator to ECU

- +12V ACC 38 pin**
- GND 1 pin**
- line W 43 pin**

VW Hitachi

In Universal Julie Emulator
solder jumpers J3, J4 and J5

Available as Universal Julie Emulator
program no. 4

USE

Audi A6 2.8 gasoline Hitachi ECU
Engine code – AAH

Connecting emulator to ECU

+12V connector D - 8 pin

GND connector D - 1 pin

W-line connector C - 12 pin

Unplug the immo and connect W-line with K-line to have a diagnosis.

VW Valve Code

**In Universal Julie Emulator
solder jumpers J1, J3, J4 and J5**

Available as Universal Julie Emulator
program no. 5

Connecting in place of the original immobiliser

+12V ACC	red
GND	blue
W-line	green

Unplug immo and connect W-line with K-line to have a diagnosis.

Connecting emulator to the 6-pin plug of the immobiliser

VW EDC15 immo OFF (single use)

**In Universal Julie Emulator
solder jumper J2**

Available as Universal Julie Emulator
program no. 6

VW EDC15 immo ON (single use)

**In Universal Julie Emulator
solder jumpers J1 and J2**

Available as Universal Julie
Emulator program no. 7

**VW EDC15 immo OFF or ON programs
are single use and can only be used in one car!**

[Back to the Contents](#) ^

This emulator replaces damaged immobiliser, instrument cluster or a car key.
Immo gets removed once the emulator is connected to the OBD socket.
In the case of losing car keys or car theft, you will be able to drive to the nearest car garage

USE

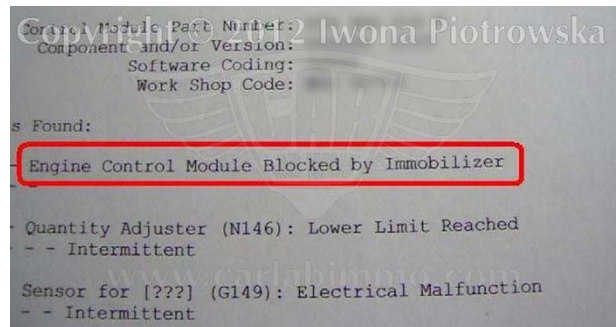

VW EDC15 immo emulator – W2 and W3 systems, diesel engines from 2000 to 2004, some to 2006, and even 2008 (except Audi with coded pump)

Suitable for vehicles with 2-socket ECUs

Engine capacity
1.2 TDI 1.4 TDI 1.9 TDI 2.5 TDI

- +12V ACC** red
- GND** blue
- K-line** green

Before using the emulator, check if there is a connection between ECU and OBD2

You can use a VW EDC15 emulator in the following situations

When getting an **Engine Control Module Blocked by Immobiliser** fault when making connection with ECU with a diagnostic interface or if your car starts and then dies

You can buy our products and obtain technical support from our distributor. Find a distributor near you by clicking on the link: www.carlabimmo.com/our-partners

16-pin OBD2 socket

1. Connect all the wires to the OBD2 socket

2. TURN IGNITION ON AND WAIT 20 SECONDS

3. When ignition is turned on, connect the emulator's plug to the emulator's PCB. Once connected, blue LED flashes fast and after several seconds the LED should emit a constant light and blink every other second

4. Turn ignition OFF and disconnect emulator

VW EDC15 emulator does not remove immo due to a program change to flash memory in ECU:

EDC15 Audi A6 2.5 TDI V6 2003
8E0 907 401 M 0 281 011 255

14-pin socket in LT

Fitting procedure of emulator is the same as for the OBD2 socket

VW EDC16 K-line immo OFF (single use)

In Universal Julie Emulator
solder jumper J3

Available as Universal Julie Emulator
program no. 8

VW EDC16 K-line immo ON (single use)

In Universal Julie Emulator
solder jumpers J1 and J3

Available as Universal Julie
Emulator program no. 9

**VW EDC16 K-line immo OFF or ON programs
are single use and can only be used in one car!**

Daewoo 1

In Universal Julie Emulator
solder jumpers J1, J2 and J3

Available as Universal Julie Emulator
program no. 19

USE

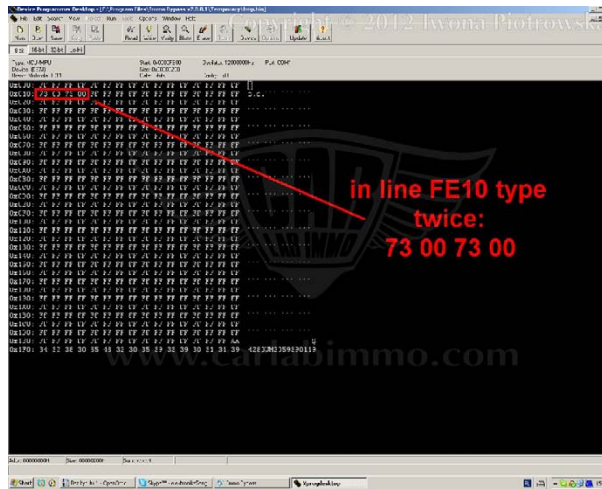

ECUs with white - red sockets and ECUs with blue sockets

ECU with white – red socket

Back to the Contents

This emulator requires modification of **Motorola HC11F1** processor located in ECU.

In address 10, write value **73 00 73 00** twice

Once you modified Motorola, connect emulator to the ECU as pictured.

Before connecting the emulator, it must be precisely insulated with insulation tape and the original immobiliser must be disconnected!!!

In case of problems with starting the car, disconnect power supply (+12V) in ECU and connect +12V ACC in place of power supply.

ECU with blue socket

This emulator requires modification of **Motorola HC11F1** processor located in ECU

In address **FE10**, write value **73 00 73 00** twice

Once you modified Motorola, connect emulator to the ECU as pictured.

- CAN-H 2.11 pin**

Find **24C04** memory

In address **1EE** to **1F9**, enter values **2A 4E 00 00 FF FF 00 9C D4 13 56 01**

Disconnect CAN from WSP!!!

**A-class 1.7 Cdi
5-socket ECU**

In Mercedes A-class 1.7 Cdi, the starter does not turn,
there is **START ERROR** on the instrument cluster

ECU is located under the bonnet on the left side behind the engine covered with plastic

Connecting emulator to ECU

ACC **2.13 pin**

GND 1.04 1.05 1.06 pin

CAN-L **2.12 pin**

CAN-H **2.11 pin**

Find **24C04** memory

In the address **1EE** to **1F9** enter values **2A 4E 00 00 FF FF 00 9C D4 13 56 01**

Disconnect CAN from WSP!!!

**EDC 1-socket ECU
2.5TD 2.9TD 3.0TD
with mechanical and electronic ignition switch**

C-class 2.5 TD
Sprinter 2.9 TD
E-class 3.0 TD

In early 1-socket ECU types, you need to find **24C02** memory marked as **B58** or **24C04** memory

In address **38** and **39** write **2A 4E** values and
in address **3F** to **42** write **9C D4 13 56** values

Connecting emulator to EDC 1-socket ECU

CAN H and CAN L from the choke.
GND and power from diode.

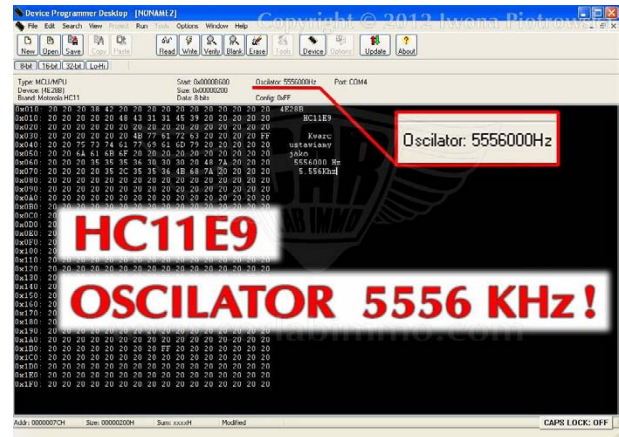

If there are problems to start the car, add ACC onto pin 13 of ECU
(take it from second leg of diode). Then, cut off pin 13 from the ECU plug

Disconnect CAN from WSP!!!

Bosch ECU with HC11E9

There is Motorola **4E28B HC11E9 52PLCC** in ECU

Before reading content, set oscillator at 5556000Hz!

1st CHANGE

In addresses from **019** to **01E** (ETL 619 to 61E), write **FF** values

Back to the Contents

2nd CHANGE

In addresses from **029** to **02E** write **FF** values

Connecting emulator to ECU

- +12V ACC** **A2 pin**
- GND** **A3 pin**
- CAN-L** **D12 pin**
- CAN-H** **D11 pin**

After connecting the emulator, you need to carry out personalization with **HHT** or **Star Diagnosis** diagnostic tools. After starting the engine, you must run the car for 60 seconds for coding to be completed.

**E-class Lucas 4-socket ECU
with mechanical and electronic ignition switch**

Mercedes E-class 2.0 diesel 1996
Lucas A0195459432 ed013 sw25.96 fd30.96

ECU is located in the engine compartment on the passenger side

Motorola **HC11KW1** quartz **8MHz** – connection of **X-Prog** programmer to Motorola

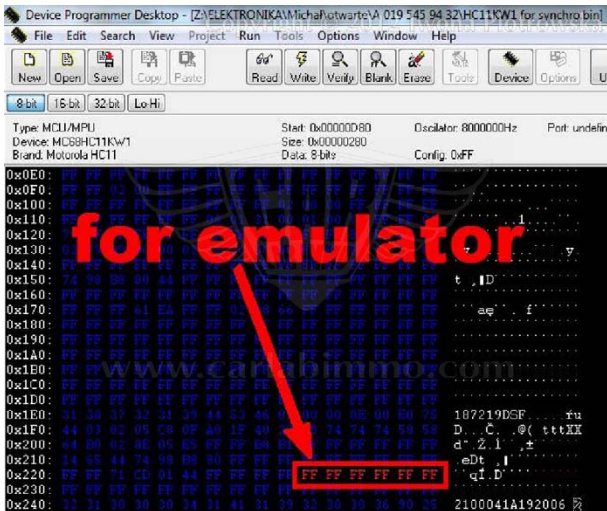

Before a getting connection to processor you have to connect pin 70 and 71 together with a needle.
Solder the wire to the needle that you then connect to GND.

pin 63	VSS ground	GND
pin 64	VDD +5V	A3 pin
pin 69	reset	B5
pin 70	Mod B to GND	B4
pin 71	Mod A to GND	GND
pin 72	RXT	B3
pin 73	TXD	B2

Back to the Contents

Change to **HC11KW1** processor

In address from **22A** to **22F** write **FF** value

Connecting emulator to ECU

- +12V ACC A16 pin**
- GND C9 pin**
- CAN-L A10 pin**
- CAN-H A1 pin**

After connecting the emulator, you need to carry out personalization with **HHT** or **Star Diagnosis** diagnostic tools. After starting the engine, you must run the car for 60 seconds for coding to be completed.

Disconnect CAN from WSP!!!

A-class VDO MSM ECU 1.4 1.6 1.9 gasoline

ECU is located on the air delivery pipe together with with Air Mass Flow Sensor

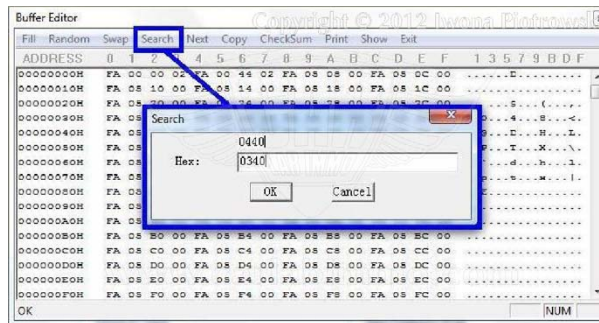

Connecting emulator to ECU

- +12V ACC** red
- GND** blue
- CAN-L** white
- CAN-H** black

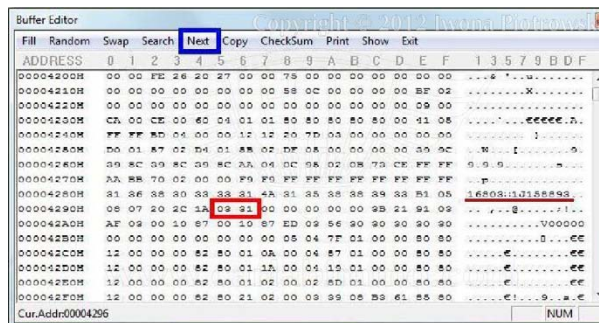

Back to the Contents

To read and make changes to memory, use **Wellon** programmer

Once **29F200** (44pin) flash memory is read, write **03 40** (or **04 40**) value in search window

All **03 40** (or **04 40**) values which you will find under chassis number, change into **03 01** (or **04 31**)

After soldering, you carry out personalisation with the **Star Diagnosis**.

Disconnect CAN from WSP!!!

Mercedes CR1 with CAN EZS

In Universal Julie Emulator
solder jumpers J1, J2, J3, J4 and J5

Available as Universal Julie
Emulator program no. 27

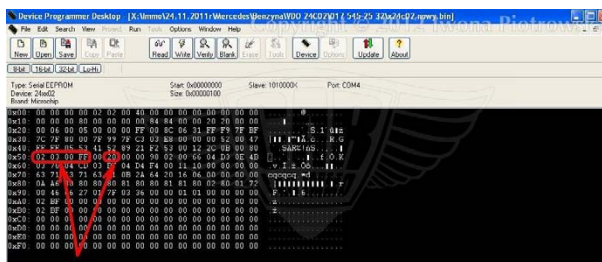

USE

Mercedes 2-socket (white) VDO ECU
with memory 24C02

Find **24C02** eeprom in ECU

FOR CODING

In the addresses from **050** to **053** write **02 03 00 FF** values, and in address **055** write **20** value in **24C02** eeprom

FOR CODING

or in addresses from **020** to **023** write **02 03 00 FF** values, and in address **027** write **20** value in **24C02** eeprom

Connecting emulator to ECU

- +12V ACC 39 pin
- GND 33 pin
- CAN-L from choke
- CAN-H from choke

After connecting the emulator, you need to carry out personalization with **HHT** or **Star Diagnosis** diagnostic tools. After starting the engine, you must run the car for 60 seconds for coding to be completed.

Mercedes CR1 with CAN infrared

In Universal Julie Emulator
solder jumpers J6

Available as Universal Julie Emulator
program no. 29

USE

Mercedes 2-socket (black) VDO ECU
with X24C01 memory

Mercedes 2-socket (yellow) VDO ECU
with X24C02 memory

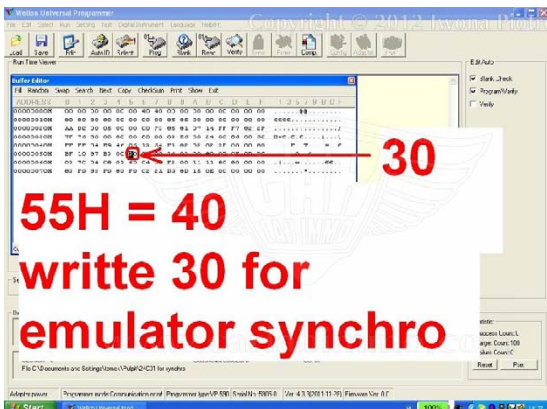

Mercedes 2-socket Bosch ECU
with B58 (24LC02) memory

Back to the Contents

Mercedes 2-socket (black) VDO ECU
with X24C01 memory

Find **X24C01** eeprom

In address **055** write **30** value

Connecting emulator to ECU

- +12V ACC** 39 pin
- GND** 33 pin
- CAN-L from choke
- CAN-H from choke

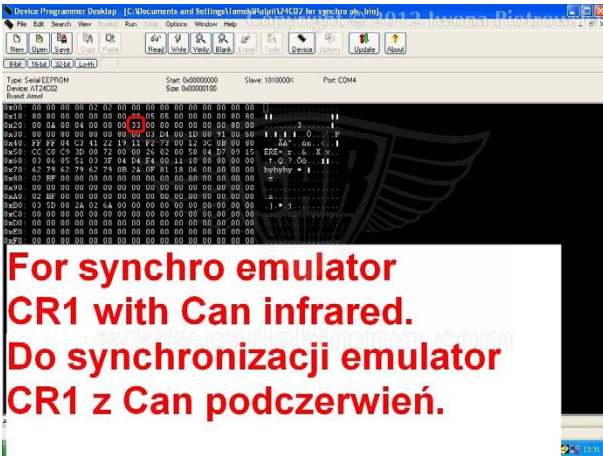

After connecting the emulator, you need to carry out personalization with **HHT** or **Star Diagnosis** diagnostic tools. After starting the engine, you must run the car for 60 seconds for coding to be completed.

Mercedes 2-socket (yellow) VDO ECU with X24C02 memory

In the ECU find **X24C02** eeprom

Back to the Contents

In address **027** write **33** value in **X24C02** eeprom

Connecting emulator to ECU

- +12V ACC 39 pin**
- GND 33 pin**
- CAN-L from choke
- CAN-H from choke**

After connecting the emulator, you need to carry out personalization with **HHT** or **Star Diagnosis** diagnostic tools. After starting the engine, you must run the car for 60 seconds for coding to be completed.

Back to the Contents

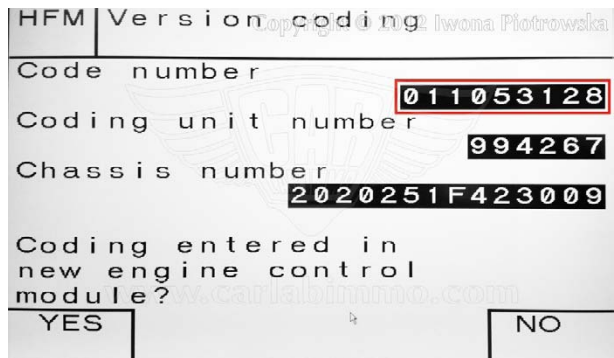

**Mercedes 2-socket Bosch ECU
with B58 (24LC02) memory**

Before the eeprom's change read code number from the ECU - see photos below

To program the **24LC02** microchip use the X-prog programmer and then use the Julie emulator with J6 jumper solder. At last make the synchro with Starr Diagnosis

In the ECU find **B58 (24LC02)** eeprom

In address **01A** write **33** value in **24LC02** eeprom

Write value 33 !!!

Connecting emulator to ECU

+12V ACC 40 pin

GND 33 pin

CAN-L from choke

CAN-H from choke

After connecting the emulator, you need to make personalization with **HHT** or **Star Diagnosis** diagnostic tools. After starting the engine, you must run the car for 60 seconds for coding to be completed.

Mercedes CR2 with CAN WSP

In Universal Julie Emulator
solder jumpers J1, J3 and J4

Available as Universal Julie Emulator
program no. 30

USE

Sprinter 2.2 Cdi and 2.7 Cdi
ML 2.7 Cdi 5-socket – automatic start
Also suitable for 2.7 and 3.2 with electronic ignition switch – automatic start

Back to the Contents ^

When emulator is connected, disconnect CAN from original immo!

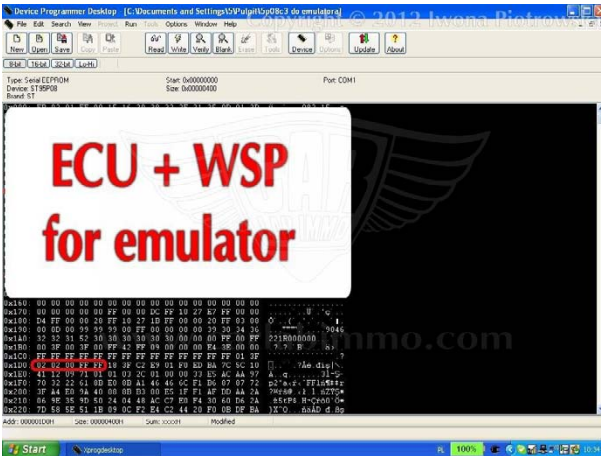

Connecting emulator to ECU

Find **5P08C3** memory

Back to the Contents

In addresses from **1D0** to **1D4** write **02 02 00 FF FF** values that will start the car automatically

If you have an electronic ignition switch, the following changes should be made to **5P08C3** memory

In address **131** write **12** value and from **1D0** to **1D4** write **02 02 00 FF FF** values

Mercedes ESL – steering wheel column lock emulator

In Universal Julie Emulator
solder jumpers J3 and J5

Available as Universal Julie Emulator
program no. 31

Warning!!!

Due to possible construction changes of cars, check signals with multimeter in the ECU plug
before connecting the device.

It does not replace the new steering locks with NEC!

Type 1 ESL
W202, W208, W210

Type 2 ESL

W203, W209, W211, Vito 639, W906 (Sprinter II, VW Crafter)

It works with ignition switches numbered

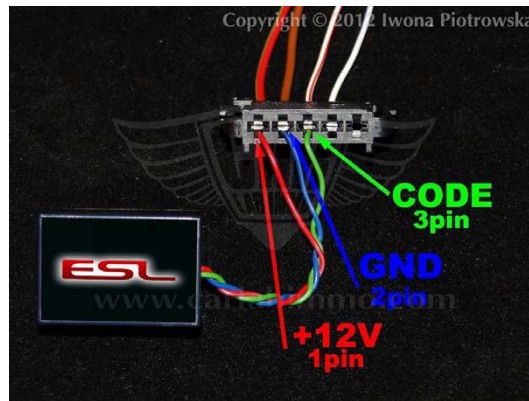

- | | |
|---------------|---------------|
| 208 545 00 08 | 208 545 01 08 |
| 208 545 02 08 | 208 545 03 08 |

In **93C56** memory write **8A 57 01 07** values in addresses from **04** to **07**

Connection diagram example

Disconnect immo box and connect emulator to the immo's box plug

- GND** 1 pin
- Immo line** 2 pin
- +12V ACC** 3 pin

TMS 374 – Citroen, Peugeot, Renault

In Universal Julie Emulator
solder jumpers J2 and J3

Available as Universal Julie Emulator
program no. 41

EMULATOR'S POWER +5V

USE

Renault ECU with TMS374 processor

Siemens Fenix 5
Sagem Safir 1
Sagem Safir 2

Citroen, Peugeot ECU with TMS374 processor

Sagem SL96
Magnetti Marelli 1AP20, 1AP40, 1AP41, 1AP43, 1AP80, 1AP81, 1AP83, 1AP90

Volvo with TMS374 processor

Siemens Fenix 5
(Volvo V40/S40 1,8i 1996-1999 ECU S113727100C_VOLVO, 30850998-01)
Siemens (Volvo V40/S40 1,8i 1996 ECU
S113716100C, HOM7700860924)

Before removing immo, cut the immo cable off the ECU plug

- Sagem SL96 – 48 pin
- Magnetti Marelli 1AP - pin 48 and 27
- Fenix5 1.4 and 1.6 - 37 pin, Fenix5 1.8 and 2.0 - 35 pin
- Sagem Safir1 35-pins – 30 pin
- Sagem Safir2 55-pins - 37 pin
- Siemens Fenix 5 S113727100C – Volvo 1.8 55 pins – 35 pin
- Siemens S113716100C – Volvo 1.8 55 pins – 35 pin

IMMO REMOVAL PROCEDURE

After cutting the immo cable off, find **pin 22** of **28F512** or **29F010** flash or **pin 21** of **27C512** or **29C512** eeprom in ECU. Solder green wire onto either of the pins depending on memory type. Solder GND onto pin 16 and solder power supply +5V VCC onto pin 32.

Turn the ignition on for one minute

Then, turn the ignition off and wait 5 seconds. Next turn the ignition on and wait 5 seconds (repeat this action 7 times)

Disconnect the plug from emulator and check if car starts.

Back to the Contents 

If you have a problem with removing immo from the ECU

- disconnect „minus” battery for approx. 30 seconds before starting this procedure again,
- during the procedure turn the starter several times

PINOUT IN MEMORY

If you still have any problems with removing immo please watch the instructional video

You can buy our products and obtain technical support from our distributor. Find a distributor near you by clicking on the link: www.carlabimmo.com/our-partners

Yamaha

In Universal Julie Emulator
solder jumpers J3 and J6

Available as Universal Julie Emulator
program no. 42

USE

Yamaha motorbikes
and scooters from 2004 to 2010

YZF R1 / YZF R6
FZ6 N / FZ6 S
T-MAX
X-MAX
V-MAX
and others

Connecting Emulator to the wiring is presented in the pictures below:

You connect code line by pressing the RESET button. In order to start the motorbike you firstly need to press and hold the RESET button, then turn the ignition and then release the RESET button. Now you can start the engine.

The wires:

Red with green stripe and grey - cover with insulation tape

If a fuel pump does not work during turning the ignition, this is a symptom of immobiliser malfunction. In such an event, you can use this emulator.

[Back to the Contents](#) ^

ATTENTION!!!

This emulator can only be used for testing purposes or to verify accurate functioning of AirBag system.

This emulator cannot remain in your car as a replacement for new seat occupancy mat

The emulator needs to be connected to the plug under the passenger seat instead of original seat occupancy sensor.

There are 3 cables

+12V ACC **red**

GND **blue**

Digital signal **green**

Before connecting the emulator, use multimeter to check signals on pins in the plug!

No.1 BMW – *without installed child seat*

In Universal Julie Emulator
solder jumpers J1 and J7

Available as Universal Julie Emulator
(Seat Occupancy Sensor program no. 1)

USE

Attention!

If still, after installation of the emulator, your car signalizes unfastened passanger seatbelt fault, then put in a resitor in place of seatbelt sensor.

For E90, use 680 oHm

For E60, use 510 oHm

Europe from 2007 to 2010

E60 , E63 , E64 , E65 , E70 , E71 , E81 , E90 , E92 , E93

No.2 Mercedes - *without installed child seat*

**In Universal Julie Emulator
solder jumpers J2 and J7**

Available as Universal Julie Emulator
(Seat Occupancy Sensor program no. 2)

No.3 Mercedes - *with installed child seat*

**In Universal Julie Emulator
solder jumpers J1 J2 and J7**

Available as Universal Julie Emulator
(Seat Occupancy Sensor program no. 3)

USE

- E-class W211 from 2002 to 2004 with Temic airbag controller
- S-class W220 from 2003 to 2005

No.4 Mercedes - *without installed child seat*

**In Universal Julie Emulator
solder jumpers J3 and J7**

Available as Universal Julie Emulator
(Seat Occupancy Sensor program no. 4)

No.5 Mercedes - *with installed child seat*

**In Universal Julie Emulator
solder jumpers J1 J3 and J7**

Available as Universal Julie Emulator
(Seat Occupancy Sensor program no. 5)

USE

- A-class W168 from 1997 to 2001
- C-class W202 from 1999 to 2001
 - Vito W638 up to 2003
- ML 1999 with TRW airbag controller
- E-class W210 up to 1999, before lifting with airbag OFF indicator

After correctly connecting the emulator, SRS/AIRBAG fault on instrument cluster goes off without necessity to delete the code of faults.

No.6 Mercedes - *without installed child seat*

**In Universal Julie Emulator
solder jumpers J2, J3 and J7**

Available as Universal Julie Emulator
(Seat Occupancy Sensor program no. 6)

No.7 Mercedes - *with installed child seat*

**In Universal Julie Emulator
solder jumpers J1, J2, J3 and J7**

Available as Universal Julie Emulator
(Seat Occupancy Sensor program no. 7)

USE

- E-class W210 from 1999 to 2003 with airbag OFF indicator after lifting
 - Vito W639 from 2002 to 2005
 - ML W163 from the year 2000
- A-class W168 from 2002 to 2005
- S-class W220 from 2000 to 2003
 - C-class W203 up to 2005
 - CLK W209
 - Vaneo

No.8 BMW - *without installed child seat*

**In Universal Julie Emulator
solder jumpers J4 and J7**

Available as Universal Julie Emulator
(Seat Occupancy Sensor program no. 8)

No.9 BMW - *with installed child seat*

**In Universal Julie Emulator
solder jumpers J1, J4 and J7**

Available as Universal Julie Emulator
(Seat Occupancy Sensor program no. 9)

USE

Models from 1997 to 2003:
E31, E36, E38, E39, E46, E53,
Models from 2003 to 2007:
E60, E63, E65, E87, E90

No.10 Mini Cooper - *without installed child seat*

In Universal Julie Emulator
solder jumpers J2, J4 and J7

Available as Universal Julie Emulator
(Seat Occupancy Sensor program no. 10)

No.11 Mini Cooper – *with installed child seat*

In Universal Julie Emulator
solder jumpers J1, J2, J4 and J7

Available as Universal Julie Emulator
(Seat Occupancy Sensor program no. 11)

USE

Mini Cooper from 2002 to 2005

No.12 Mazda - *without installed child seat*

**In Universal Julie Emulator
solder jumpers J3, J4 and J7**

Available as Universal Julie Emulator
(Seat Occupancy Sensor program no. 12)

No.13 Mazda - *with installed child seat*

**In Universal Julie Emulator
solder jumpers J1, J3, J4 and J7**

Available as Universal Julie Emulator
(Seat Occupancy Sensor program no. 13)

USE

- Premacy
- MX-5
- 626
- 323
- 6

No.14 Fiat Stilo - *without installed child seat*

**In Universal Julie Emulator
solder jumpers J2 J3, J4 and J7**

Available as Universal Julie Emulator
(Seat Occupancy Sensor program no. 14)

No.15 Fiat Stilo - *with installed child seat*

**In Universal Julie Emulator
solder jumpers J1, J2 J3, J4 and J7**

Available as Universal Julie Emulator
(Seat Occupancy Sensor program no. 15)

USE

Fiat Stilo

No.16 Mercedes

**In Universal Julie Emulator
solder jumpers J5 and J7**

Available as Universal Julie Emulator
(Seat Occupancy Sensor program no. 16)

USE

- E-class W211 from 2004 to 2007 Temic
- SL W230 models the year 2004 only
- SLK W171 from 2004 to 2011

No.17 Mercedes

**In Universal Julie Emulator
solder jumpers J1, J5 and J7**

Available as Universal Julie Emulator
(Seat Occupancy Sensor program no. 17)

USE

- E-class W211 from 2003 to 2007 Bosch controller
- C-class W203 from 2006 to 2007
 - CLS W219 from 2005 to 2010
 - CLK W209 from 2006 to 2009
- S-class W220 from 2002 to 2005
- S-class W221 the year 2006 only

No.18 Mercedes

**In Universal Julie Emulator
solder jumpers J2, J5 and J7**

Available as Universal Julie Emulator
(Seat Occupancy Sensor program no. 18)

USE

E-class W211 from 2002 to 2003 with airbag control unit:

Temic - 002 820 35 26

Bosch - 002 820 29 26, 0 285 001 441

Tachometer tester programs

USE

You can use it to turn on the instrument cluster on the table in order to diagnose faults. After connecting the emulator to instrument cluster, most of instrument cluster segments are displayed making it easier to locate damaged areas.

Emulator is reusable!

Tested on tacho:

Audi Q7 and A6
Citroen C4 Picasso
EMF Display
Renault Kangoo 3 Display
Renault Scenic II, Espace IV Tacho
Renault Scenic II Full
Renault Scenic III + Navi
VW Passat B6

Audi Q7 and A6

In Universal Julie Emulator
solder jumpers CAN120R, J2, J4 and J6

Available as Universal Julie Emulator
(Tachometer tester program no. 1)

Connecting to grey socket

+12V ACC	15 pin
GND	14 pin
CAN-L	1 pin
CAN-H	2 pin

Citroen C4 Picasso

In Universal Julie Emulator
solder jumpers CAN120R, J1, J2, J4 and J6

Available as Universal Julie Emulator
(Tachometer tester program no. 2)

Connecting to yellow socket

+12V ACC	26 pin
GND	23 pin
CAN-L	13 pin
CAN-H	9 pin

EMF Display

In Universal Julie Emulator
solder jumpers CAN120R, J3, J4 and J6

Available as Universal Julie Emulator
(Tachometer tester program no. 3)

Connecting to brown socket

+12V ACC	1 pin
GND	3 pin
CAN-L	7 pin
CAN-H	9 pin

Renault Kangoo III Display

In Universal Julie Emulator
solder jumpers CAN120R, J1, J3, J4 and J6

Available as Universal Julie Emulator
(Tachometer tester program no. 4)

Connecting to display socket

- +12V ACC** **3 pin**
- GND** **12 pin**
- CAN-L** **15 pin**
- CAN-H** **16 pin**

Renault Scenic II, Espace IV Tacho

In Universal Julie Emulator
solder jumpers CAN120R, J1, J2, J4 and J5

Available as Universal Julie Emulator
(Tachometer tester program no. 5)

Connecting to grey socket
